Budhishali Tangram Champions Challenge - Description and Practice Instructions:

Budhishali Tangram Champions Challenge is a highly challenging iQ and Memory Power booster puzzle that use 7 Tangram pieces, that are made by cutting seven distinctively shaped pieces from a square. There are two big two small triangles, one intermediate triangle, one parallelogram and one square.

Tangrams develop concentration, problem solving ability, geometric thinking, spatial sense and speedy execution.

How to practice for Budhishali Tangram Champions Challenge:

The rules of practicing with seven pieces of a Tangram, for the Budhishali Tangram Olympiad are simple.

1. The pieces must all be connected.
2. They must be flat.
3. No pieces may overlap.
4. The pieces may also be rotated or flipped, to form the shape.
5. All the seven pieces must be used.
6. Each completed puzzle must contain all the seven pieces.

Students will get the basic pattern of Tangram, in a workbook given to students as a part of the Olympiad. Make as many photocopies as required for practice and use it to solve the various puzzles given in the workbook, in the shortest time possible. Cut the pieces and then stick on a thicker sheet of paper, in the desired shape as given in the book. After doing sufficient practice with/without parental help, children should solve puzzles, without looking at the picture in the workbook.

Given an image, the goal is to build a similar figure using all (and only) the puzzle pieces, without overlapping. We'll call the given first image below, the shadow image, where the inner borders of the built figure are not shown. The images where the inner borders are displayed, are given in the book for practice.

Image of a Walking Person:

Important instruction for parents and students, regarding Budhishali Tangram Champions Challenge:

All students will be given outline images (like the one given above) for reference, to make them understand the Tangram images, they have to make during the test. After thorough observation, students need to recreate the given images, using the 7 Tangram pieces. So, participating students should practice the images given in the book, as many times, as possible.

Parents along with their child should stick the photocopy of the Tangram puzzles squares sheet in the workbook, on a thicker sheet of paper, cut the sheet into seven (7) Tangram pieces and then use the Tangram pieces for regular practice.
